Installation Instructions for AMP-9901 – Ice Scratchers

General Instructions:

This kit can be installed anywhere near the front track shock. The main mounting hole is 3/8" in diameter. The front of the spring fits into a 9/32" diameter hole located 2-1/4" forward of the 3/8" hole. The front part of the spring should be approximately 1/4" higher than the 3/8" hole. The scratcher should point downward and kick snow up into the track and cooler at the back of the sled and so that the scratcher can be pulled up and hooked over the rail when not in use. The scratcher should not interfere with any moving parts of the suspension or track at any time.

WARNING: Raise scratchers when loading and backing up to avoid breaking them.

	<h3>Generic Installation Instructions</h3> <ol style="list-style-type: none"> 1. Mark, punch, and drill a 3/8" hole 5/8" above the rail rib and behind the idler wheel hole. 2. Mark, punch, and drill a 9/32" hole 2-1/4" forward of the 3/8" hole and 1/4" higher than the 3/8" hole. <p>Install the scratchers with the supplied hardware as shown.</p>
